Adithya B K

AI/ML Engineer | Applied Machine Learning & NLP

+91 8971095311 | adithya.bk01@gmail.com | LinkedIn | GitHub | Mandya, India

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence & Machine Learning, with hands-on experience across the ML lifecycle — data preprocessing, model training and evaluation, NLP, and LLM integration. Experienced designing AI-driven features for production platforms and turning data into decision-ready insights through analytics and dashboards.

WORK EXPERIENCE

Machine Learning Trainee — Internship *Aug 2024 – Oct 2024*

Employability.life

- Built a supervised-learning cancer-cell classification pipeline on a synthetic dataset, covering preprocessing, model training, and evaluation.
- Applied correlation analysis to reduce feature dimensionality from 32 to 18 features; evaluated model performance using 5-fold cross-validation.
- Technologies: Python, Scikit-learn, Pandas.

PROJECTS

MediRead — AI-Based Medical Report Understanding System *NLP & LLM Integration*

- Built a pipeline to extract lab values from PDF medical reports using text parsing and regex.
- Implemented abnormal-value detection with rule-based concern classification.
- Integrated Llama3 (via Ollama) to generate multilingual explanations with voice output, making clinical results accessible to non-technical users.

Tech Stack: Python, NLP, Llama3/Ollama

Kisan Sethu — AI-Powered AgriTech Marketplace *AI Feature Design*

- Defined AI-driven features for a full-stack agricultural marketplace: crop recommendation, plant disease detection, produce quality grading, and a multilingual chatbot assistant.
- Directed the platform's AI feature architecture alongside REST API integration and role-based access control (React.js, FastAPI, PostgreSQL).

Tech Stack: React.js, TypeScript, FastAPI, PostgreSQL

Startup Investment Trends in India — Data Analytics & BI *Data Analytics*

- Analyzed startup investment data across sectors and regions using Python and MySQL to identify funding trends and patterns.
- Cleaned and structured raw datasets for analysis and reporting; built interactive Power BI dashboards to visualize investment trends.

Tech Stack: Python, MySQL, Power BI

TECHNICAL SKILLS

ML & Data: Scikit-learn, Pandas, NumPy, EDA, Data Cleaning

NLP & LLMs: NLP (TF-IDF), LangChain, Llama3 (via Ollama)

Languages: Python, SQL, Java, C++, C, Swift

Databases & BI: MySQL, Database Design, Power BI

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code

EDUCATION

PES College of Engineering, Mandya *Oct 2023 – Oct 2027*

B.E. in Computer Science and Engineering — Artificial Intelligence & Machine Learning

CGPA: 7.73 / 10 (through 6th Semester)

CERTIFICATIONS

- Machine Learning with Python — IBM
- Fundamentals of Natural Language Processing — University of Colorado Boulder
- Introduction to AI and Machine Learning on Google Cloud — Google Cloud
- Deloitte Australia Data Analytics Job Simulation — Forage
- Prompt Engineering for ChatGPT — Vanderbilt

ACHIEVEMENTS

- Qualified for Smart India Hackathon (SIH) 2025 at the national level.
- Runner-Up, Minute to Win (ISTE) — placed 2nd of 50+ participants across a 6–7 mini-game event.
- Industry 4.0 Foundation Certification — Microsoft & SAP CSR Initiative (TechSaksham / Edunet Foundation / AICTE).
