github.com/Adithyabk01
Mandya, India

Computer Science undergraduate with hands-on experience building full-stack, production-style web platforms and applied ML/NLP integrations. Skilled in Python, React.js, TypeScript, and FastAPI, with a strong foundation in data structures, algorithms, and scalable system design. Comfortable working across the stack — from REST API design and authentication to responsive UI and database architecture.

EDUCATION

PES College of Engineering, Mandya Oct 2023 – Oct 2027
B.E. in Computer Science and Engineering — Artificial Intelligence & Machine Learning, currently pursuing 4th year, with 7.73 CGPA

EXPERIENCE

Machine Learning Trainee — Internship, Employability.life Aug 2024 – Oct 2024

- Built a supervised-learning classification pipeline on a synthetic dataset, covering preprocessing, model training, and evaluation end to end.
- Applied correlation analysis to reduce feature dimensionality and validated model performance using k-fold cross-validation.
- Technologies: Python, Scikit-learn, Pandas.

PROJECTS

Kisan Sethu — AI-Powered AgriTech Marketplace — Product Design & Full-Stack Development

- Architected a full-stack marketplace connecting farmers, buyers, agricultural agents, and transporters, using React.js, TypeScript, FastAPI, and PostgreSQL.
- Designed JWT-based authentication with role-based access control across four distinct user types.
- Built REST APIs, real-time notifications, and role-specific dashboards; directed responsive UI/UX with Tailwind CSS.
- Specified AI-driven feature integrations (crop recommendation, disease detection, multilingual chatbot) within the platform architecture.

Tech Stack: React.js, TypeScript, FastAPI, PostgreSQL, Tailwind CSS

Startup Investment Trends in India — Data Analytics & BI — Backend Data Pipeline

- Built a data pipeline in Python and MySQL to clean, structure, and query startup investment data across sectors and regions.
- Designed interactive Power BI dashboards on top of the pipeline to surface funding trends for end users.

Tech Stack: Python, MySQL, Power BI

MediRead — AI-Based Medical Report Understanding System — Backend & AI Integration

- Built a pipeline to extract lab values from PDF medical reports using text parsing and regex, with rule-based abnormal-value detection.
- Integrated Llama3 (via Ollama) to generate multilingual explanations with voice output for non-technical users.

Tech Stack: Python, NLP, Llama3/Ollama

TECHNICAL SKILLS

Languages: Python, Java, C++, C, TypeScript, JavaScript, SQL, Swift

Frameworks & Libraries: React.js, FastAPI, Tailwind CSS, LangChain

Databases: PostgreSQL, MySQL, Firebase

Core CS: Data Structures & Algorithms, REST API Design, System Design, Authentication & Authorization

Tools & Platforms: Git, GitHub, VS Code, Linux, Judge0 API

CERTIFICATIONS

- Introduction to DevOps — IBM
- Software Engineering: Software Design and Project Management — HKUST
- Prompt Engineering for ChatGPT — Vanderbilt
- Deloitte Australia Technology Job Simulation — Forage

ADDITIONAL INFORMATION

- Qualified for Smart India Hackathon (SIH) 2025 at the national level.
- Runner-Up, Minute to Win (ISTE) — placed 2nd of 50+ participants across a 6–7 mini-game event.
- Industry 4.0 Foundation Certification — Microsoft & SAP CSR Initiative (TechSaksham / Edunet Foundation / AICTE).
